File 2303 {

MMF File Name	Contents
	<b>Policies, User Groups, and Information Sets 2305</b>
DBUsersFile 2307	Describes policy application from the User Group viewpoint. Maps each DB UserGroupID to a list of ResourceGroupIDs with flags that indicate whether the policy that relates each pair is an allow or deny policy.
DBUsersTreeFile	Describes the user groups tree as a flattened array. Maps each DB UserGroup ID to a list of UserGroupIDs for parent user groups
DBResourcesFile 2309	Describes policy application from the Resource Group (information set) viewpoint. Maps each DB ResourceGroupID to a list of UserGroupIDs with flags that indicate whether the policy that relates each pair is an allow or deny policy.
DBResourcesTreeFile	Describes the resource groups tree as a flattened array. Maps each DB ResourceGroupID to a list of ResourceGroupIDs for parent information sets.
	<b>User Identification Information 2311</b>
DBIPRangesFile	IP Ranges data. Maps from IPRangeDefID to the IP range data.
DBDomainsFile	IP Domain data. Maps from DomainDefID to the IP domain data.
DBCertificatesFile	Certificate data. Maps from CertificateDefID to the certificate data.
DBWindowsIDFile	Windows ID data. Maps from WindowDefID to the windows ID data.
DBSmartCardIDFile	Smart card (authentication token) data. Maps from Smartcard-DefID to the authentication token data.
DBIPRangesByUserGroup File	Relates IP range matching criteria to user groups. Maps from IP Range data to UserGroupIDs.
DBDomainsByUserGroup File	Relates IP domain matching criteria to user groups. Maps from IP Domain data to UserGroupIDs.
DBCertificatesByUserGroup File	Relates certificates to user groups. Maps from certificate data to UserGroupIDs. 2101
DBWindowsIDByUserGroup File	Relates Windows IDs to user groups. Maps from Windows ID data to UserGroupIDs.
DBSmartCardIDByUser GroupFile	Relates Smart Card (authentication token ) data to user groups. Maps from authentication token data to UserGroupIDs

2301

Fig. 23A

MMF File Name	Contents
	<b>Servers, Services, and Information Resources 2313</b>
DBResourcesByServerIDFile	Relates servers to resources. Maps from ServerIDs to ResourceIDs for resources held on the server identified by the ServerID.
DBResourcesByServiceIDFile	Relates services to resources. Maps from ServiceIDs to ResourceIDs for resources belonging to the service identified by the ServiceID.
DBResourceIDByServiceIDFile	Relates services to their information resources. Maps from ServiceID to ResourceID.
DBResourceIDByNameFile 2315	Relates the IP names (URLs) of resources to resource IDs. Maps from URL to resource ID.
DBResourcesByResourceIDFile 2317	Relates resources to information sets. Maps ResourceID to Resource GroupIDs.
	<b>Servers, Services, IP Information, and Proxies 2319</b>
DBServerIDByIPFile	Relates IP addresses to servers. Maps IP addresses to ServerIDs.
DBServerIDByNameFile	Relates IP names to servers. Maps the IP FQDN (fully qualified domain name) for each server to its ServerID.
DBIPAndTypeByServerIDFile	Relates servers to their locations inside or outside to the VPN. Maps ServerID to the server's IP address and a flag indicating whether the address is inside or outside the VPN.
DBServiceIDByPortFile	Relates services to their port numbers. Maps from ServiceID to port number.
DBServiceIDByServerIDFile	Relates servers to ports for services. Maps from ServerID to a list of port numbers.
DBServicePortToProxyPortFile	Relates service ports to the ports for their proxies. Maps from service port number to proxy port number.
DBProxyIDByServerIDFile	Relates servers to service proxies. Maps from ServerID to ProxyDefID.
DBProxyParametersFile	Relates proxies to configuration data for the proxies. Maps from ProxyDefID to options data

2301

Fig. 23B

MMF File Name	Contents
	<b>Access Filter Information    2321</b>
DBAttachedNetworksByIPFile	Relates network interfaces in the access filters to information for the interfaces. Maps from the interface's IP address to interface information.
DBAttachedNetworksByServerIDFile	Relates access filters to their network interfaces. Maps from ServerID for the access filter to interface information.
DBRoutingTableFile	Describes the IP routing information for all of the access filters. One block of information.
DBRoutingTableByServerIDFile	Relates access filters to their IP routing information. Maps from ServerID for the access filter to IP routing information.
DBPointToPointFile	Relates a point-to-point description of a network path to data for the path. Maps from PointToPointID for the path to the associated data.
	<b>SEND Information    2323</b>
DBTrustTableFile <b>2325</b>	Implements the SEND table. Maps from TrustDefID, indicating a trust level, to AuthenticationIDs for user identification techniques and EncryptionIDs for encryption techniques.
DBCertificateAuthoritiesFile	Relates identifiers for certificate authorities to their data. Maps from CertificateAuthorityID to associated data.
DBTrustAuthenticationsFile	Relates AuthenticationIDs to information about identification techniques. Maps from AuthenticationID to identification technique information.
DBTrustEncryptionsFile	Relates EncryptionIDs to information about encryption techniques. Maps from EncryptionID to encryption type and strength information.
	<b>IntraMap Information    2422</b>
DBJavaSiteTable	Maps from names of locations to LocationIDs.
DBJavaResourceTable	Maps from URLs of resources to their ResourceIDs, LocationIDs, and <i>hidden</i> flags.
DBJavaResourcesSetTable	Maps from names of information sets to ResourceGroupIDs, a list of ResourceIDs for all resources contained in the information set, and a list of ResourceGroupIDs for all of the information set's parents.
